1 Preview Server 4.4.1

Release Date: 2021-01-29

These are the release notes for Preview Server 4.4.1. This document describes the user-visible changes that have been made to the software since version 4.4.0.

1.1 Fixed Issues

- Handling of FieldRefs that references child fields (FS-460, PDS-500, PDS-504).
- HTTP error 400 returned when requesting a snapshot with only ignored layers (FS-446).

1.2 Known Issues

- No known issues.

2 Preview Server 4.4.0

Release Date: 2020-05-28

These are the release notes for Preview Server 4.4.0. This document describes the user-visible changes that have been made to the software since version 4.3.0.

2.1 New Features

- **Enable Preview Server to accept a bgfx master template in the snapshot payload**
When rendering a snapshot request, the payload may now contain a bgfx master template which, if present, will override the template from the model.
- **Add new endpoint for getting a scene model**
The Preview Server now has a new endpoint that returns the VDF model for a scene.

2.2 Known Issues

- No known issues.

2.3 Documentation

Documentation for Preview Server is available at the Vizrt Documentation Center:

- [Preview Server Administrator Guide](#)¹

2.4 Support

Support is available at the [Vizrt Support Portal](#)².
